🎓 EDUCATION

B.Tech in Artificial Intelligence & Data Science

REVA University

2025 — 2029 (Expected)

Focusing on advanced machine learning algorithms, deep structures, data architectural patterns, and computer statistics metrics.

Higher Secondary Education (11th & 12th)

PACE College

Completed 2025

Specialization in Science stream focus areas (Physics, Chemistry, Mathematics).

High Schooling (ICSE)

St. Mary's ICSE School

Graduated

Foundation curriculum finishing with strong core academic analytical skills.

🔗 CORE PROJECTS

Crashsense

An intelligent crash-detection framework merging custom IoT sensor telemetry arrays with machine classification modeling to track dynamic impacts and broadcast coordinates immediately.

Smart Garage via RFID

An automated hardware infrastructure deployment leveraging secure RFID scanning tokens to track entry,

⚙️ TECHNICAL TOOLKIT

Python

C Programming

Machine Learning

Data Science

Internet of Things (IoT)

Web Development

Git & GitHub

Data Visualization

🌟 CREDENTIALS

Machine Learning Specialist

Verified core algorithm architecture metrics.

Advanced Python for Data Science

Validation of structured cleaning & analytics mechanics.

trigger automated barriers, and synchronize slot logistics instantly.
